

## Gifu Flower Weather 2000-2014: Japan past weather 15 years

Welcome! to Japan. Please enjoy the travel in Japan by choosing a comfortable season.

It is convenient and interesting e-book. It is practical science information on the so-called genre such as the past weather, the statistical weather. We will look at the weather for the past 15 years of the one day. Then, we understand the day in tends to clear up or rainy. We will travel in choose of the time which tends to clear up. It isnt necessary to choose the day which may be wet. A change in four seasons peculiar to this place is going around. Please look for it in it, a wonderful fine travel day.... And because its also affected by global warming. Whether nearest 10 years and nearest 5 years often clear up. Whether about 3 days often clear up continuously. Please confirm this important point by this e-Book. The data by which this note is the past, it isnt equalized. Data in each year is being lined just as it is. This is the big feature of this note. When you wish fine day travel, its very useful, so please use it by all means. This composition is first cover, contents, graphic legend, weather for 366 days a year, class division of the temperature, the hours of sunshine, the amount of rainfall, snow and a snowfall , Read-me, the point of view of information, the colophon, back cover, total 382 pages of construction. Further, the whole responsibility caused by use of this place information on this note is self-responsibility. Please note the point and use this place information. 1 About use data The data of Meteorological Agency offer is being used for this e-book. You can see information on 15 years in 2014 from 2000. General weather conditions show the general condition at 6:00 - 18:00 (daytime) about 3 times (9:00, 15:00, 21:00) of the observation points per Japan. Moreover, about an observation point, the general condition at 8:30 - 17:00 (daytime) is shown twice (9:00, 15:00 ) per Japan. About the daylight hours,

precipitation, and snowfall What is displayed as x is the data which was not able to be observed. What is displayed as - shows the case where the phenomenon does not exist. The precipitation of 0.0 mm and - (with no applicable phenomenon) are distinguished at the Japan Meteorological Agency. The snowfall displayed as 0 cm means the snowfall of less than 1 cm. (blank) is the element which is not observing.

2 About Copyright and Use Important This e-book does not forecast the weather of the future. It is the software of a function which checks the past meteorological data. This use result and all the responsibility in connection with use are in a user.

3 Editor brief summary of career He develop the visual weather memory software which won an excellent prize - by a grand prize of digital contents in 2001. Itll be basic software of VECTOR company in 3 months later of public opening. The value of 9 star is received by Michelin guidance of software and the grade - of the EU Soft-nick company. That said The life was given to the past data of the Meteorological Agency.?? He developed with weather related software.

4 About copyright and use Important This e-book does not forecast the weather of the future. It is the software of a function which checks the past meteorological data. This use result and all the responsibility in connection with use are in a user.

5 Others Visual weather memory software won prize for an excellent work in the part of the new talent of Digital-contents Grand Prix 2001. This software inherited that DNA and was developed. The contest is sponsored by Digital Content Association of Japan, and is the Ministry of Economy, Trade and Industry co-sponsorship.
