

Fourteenth International Conference on Numerical Methods in Fluid Dynamics: Proceedings of the Conference Held in Bangalore, India, 11-15 July 1994 (Lecture Notes in Physics)

Computational Fluid Dynamics has now grown into a multidisciplinary activity with considerable industrial applications. The papers in this volume bring out the current status and future trends in CFD very effectively. They cover numerical techniques for solving Euler and Navier-Stokes equations and other models of fluid flow, along with a number of papers on applications. Besides the 88 contributed papers by research workers from all over the world, the book also includes 6 invited lectures from distinguished scientists and engineers.
