

A Game Plan for Parents: Preparing Your Child for the Teenage Scene

This book is an indispensable guide for parents of preadolescents and adolescents. Here you will find valuable information about teenagers and the common customs and practices at the teenage scene. Between the covers of this book are practical methods for parents to use to help their children deal with the pressures of their peers. For many years, parents have been aware that the teenage scene poses some risks. Some parents decide to wait and see if a problem develops and then address it. Other parents fall prey to the many myths that help sustain not only ineffective parenting but also the teenage scene itself: All kids experiment. Everyone is doing it. There is too much peer pressure to resist. We did it. They will. Everything will work itself out. Thirty years of research has proved not only that these myths offer false hopes for parents but also preparing in advance is a key element for success. With the valuable and carefully researched information this book provides, groups of parents will find this book to be a wonderful networking tool. Together, parents can discuss these successful strategies and implement the game plan presented here.
