

Beavers: Gnawers of the Northern Woods (15-Minute Books Book 330)

How would you like to eat part of your house for food during the winter? Well that's just what some beavers do. Beavers are animals that live in the water. They spend most of their time there, even though they are mammals. That means they breathe air, so part of the time they are also on land. Beavers live in the water because it is safer for them. They can't run very fast, but they are great swimmers. Find out more about this wonderful animal and learn the answers to these questions: How does a beaver's jaw help him carry logs? At what age do beaver teeth stop growing? What color are a beaver's teeth? What are different ways do beavers talk to each other? How many rooms are there in a beaver lodge? And many more! Learn what a beaver looks like, where it lives, what it eats, what eats it, how babies are born, and other fun facts. Ages 7 to 10. All measurements in American and metric. LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.
