

## Arkansas Tornadoes: The Natural States Deadliest Twisters

Arkansas is in the center of tornado activity in the United States. In spite of its relatively small geographic size and population, the Natural State ranks among the top 5 in the number of tornadoes and tornado deaths since 1880. This book focuses on superlatives: the deadliest tornadoes and outbreaks (multiple tornadoes on the same day) both before and after 1953 (the beginning of the modern era of tornado forecasting), the deadliest day, year, and decade, the longest tornado, and the largest number of tornadoes in one day. Also included are stories of twisters that did not earn a superlative but are historically important, tornadoes that struck schools, towns that suffered multiple tornado strikes, and tornado safety rules. These accounts encompass more than 50 counties and several hundred towns and communities on which these monsters of nature inflicted pain from 1898 through 2015.
